

**Bright Day White
7 Watt LED**

**Blue Moonlight
7 Watt LED**

How to install your Bright Day White & Blue Moonlight 7w LEDs

1. Turn off the power supply to the aquarium - let the traditional 15w Energy Saving Lamp cool down for 10 minutes.
2. Then for the Fish Pod & Fish Box 48 and 64 aquariums; safely remove the top aquarium cover using a flat headed screw driver. For the Fish Pod Moon & Fish Box Moon 19 & 39 aquariums; open the hood and remove the light cover by unscrewing all the locator screws with a cross headed screw driver.
3. Next safely unscrew (anti clockwise) the 15w traditional Energy Saving Lamp from the aquarium lamp E27power socket and dispose of responsibly.

Top tip...to get the best lighting effect for the Fishpod & Fishbox aquariums, use 1 x Day White & 1 x Blue Moon for the 48 litre aquarium and 2 x Day White LEDs for the 64 litre aquarium.

4. Then using the new Interpet 7w LED, unpack and start to screw into the E27 lamp socket in a clockwise direction. Continue until the LED is fully screwed into the socket (as seen in the below images).

5. Once inserted, ensure the LEDs are pointing directly downwards otherwise this will hinder the LED light output into the aquarium. To do this easily, start by slowly twisting the main body anti clockwise until the LED chips are facing directly downwards into the aquarium (as seen in the images below).

This is possible because the LED comes complete with an internal sub rotation ring which allows the LED to be angled downwards without unscrewing from the E27 power socket.

6. Reinsert the aquarium cover or light fixture with the appropriate screws (where applicable). Then turn the main power to your aquarium lighting back on as before and enjoy

How to remove the 7w LEDs

To safely remove the 7w LED from the power socket, turn off and wait 10 minutes for the LED body to cool down. Then simply continue to twist anti clockwise until you start to feel the LED unit unscrew.

Maintenance

Once a year the LED should be removed from the aquarium (refer to removing aquarium lamps safely in section 1 above), then the LED plastic cover should be wiped with a damp cloth to remove any build-up of dust that could hinder the light output.

Important information

- This unit is for indoor use only - do not use outside.
- Do not use this unit if the LED is damaged or appears to be malfunctioning.
- Do not use this unit if it gets wet.
- Dispose of responsibly following instructions from your local authority.

Guarantee

This product is guaranteed against defects in Material and workmanship for 12 months from the date of purchase, under normal usage.

The GUARANTEE DOES NOT APPLY in case of improper use, negligence, lack of maintenance or accidental damage. If the LED fails due to a manufacturing fault within this period it will either be replaced free of charge or repaired. Liability is limited to replacement of the faulty product only no other costs will be reimbursed.

This guarantee is not transferable and does not affect your statutory rights. This guarantee does not confer any rights other than those expressly set out above.

You can help protect the environment. Please remember to respect the local regulations: hand in non-working electrical equipment to an appropriate waste disposal centre.
